

# 2022 RITEK GROUP REPORT

# RiTEK Group business map

# Data Storage

**Expect better turnover than peers to increase competitiveness**

Improve the turnover rate of finished products through low cost

Improve cash turnover with low commodity inventory  
To maintain a stable turnover rate of raw materials to improve procurement capabilities

**Introduce mature and price-competitive products to Vietnam factories with production cost advantages**

Improve customer product price competitiveness

The Vietnamese factory produces a cost that the Taiwanese factory is difficult to compete with

Some regions have tariff advantages

Production has the ability to adjust flexibly

The certified production line has been favored by most customers

**Positive Control of Optical Disc Finished Products and raw material inventory**

Flexible adjustment of production capacity to maintain inventory level

Reduced selling pressure and price maintenance

Make raw material procurement more flexible

Reduce cash backlog problem

## Actively deploy the production capacity required for the future Archive market

- Currently the only optical disc manufacturing plant in the world that still has mass production lines and capabilities from CD-R to AD 300G
- The world's first to complete and the only one to obtain ISO16963 long-life Archive certification for all products from DVD and BD25G/50G/100G/200G
- Actively obtain Archive related customer product certification and shipment

### ISO/IEC 16963 Optical Disc Archive Test

**Certificated Products;**  
DVD-R 16X (RITEK F1 Code)  
BD-R 4X SL (RITEK BR2 Code)  
BD-R 4X DL (RITEK DR2 Code)  
BD-R 4X TL (RITEK TL2 Code)  
BD-R 4X DSD (RITEK TL1 Code)

At present, Rite is the only company in the world that has mass production lines from CD-R to AD

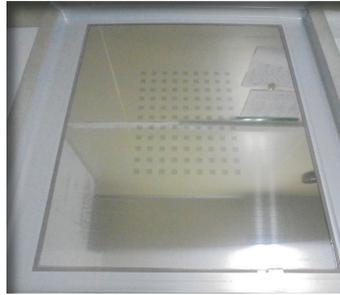

# Micro/Nano structure Business

## WLP Product

- Athlete solder ball mounting stencil-- 11 Companies
- Shibuya solder ball stencil---3 Companies
- Hitachi solder ball mounting stencil-- 1 Companies

## IC Package Industry

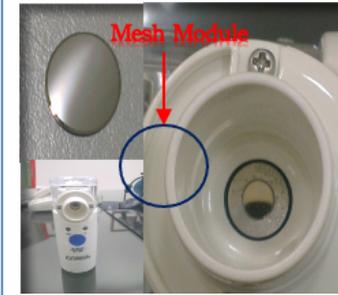

- Athlete solder ball mounting stencil-- 3 Companies
- Hitachi solder ball mounting stencil-- 2 Companies

## Mini/ Micro LED

- DEK solder paste printing stencil-- 3 Companies
- Toshiba solder paste printing stencil-- 1 Companies

## Nebulizer Product

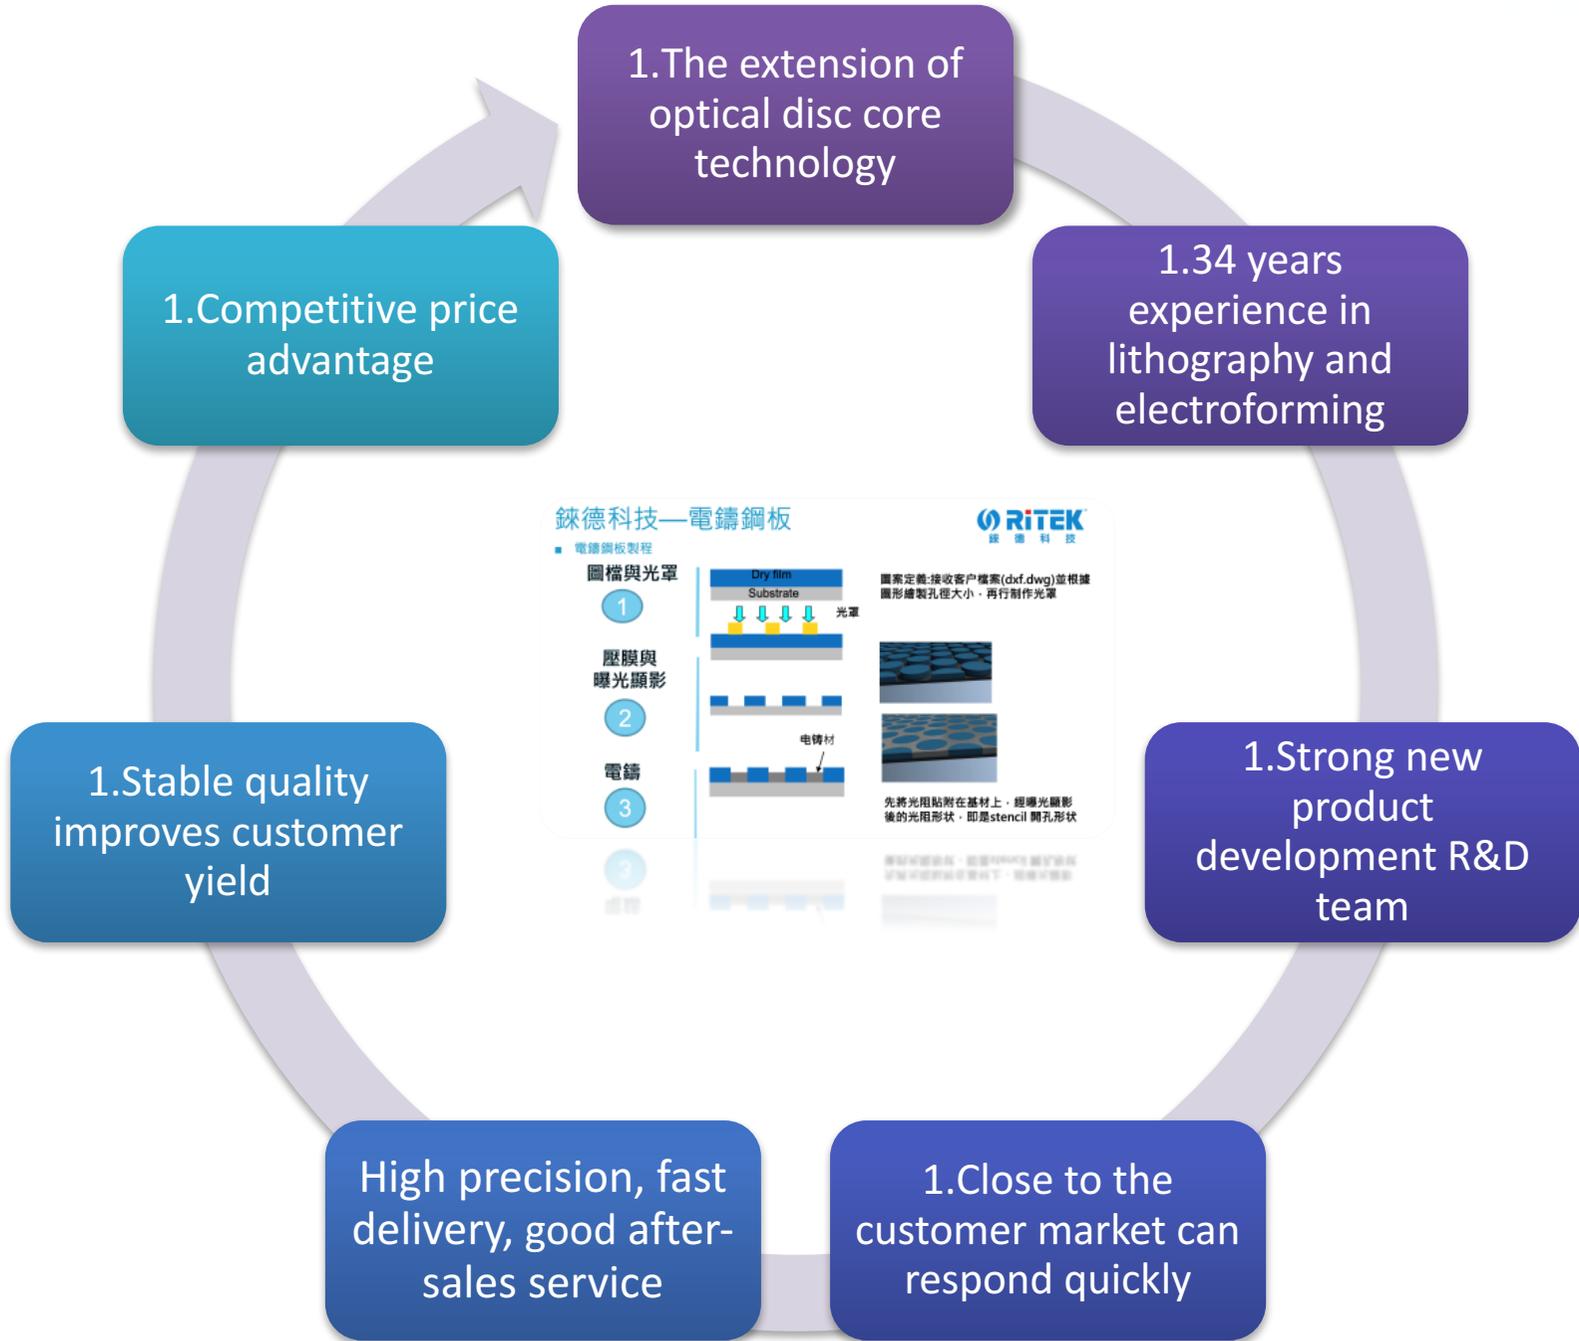

- Pd/Ni alloy mesh---4 Companies

## Display Industry

- Stamper of display industry-- 2 Companies

銖德科技—電鑄鋼板

■ 電鑄鋼板製程

圖檔與光罩

1 壓膜與曝光顯影

2 電鑄

3

Dry film  
Substrate  
光罩  
電鑄材

圖案定義:接收客戶檔案(dx.f.dwg)並根據圖形繪製孔徑大小,再行製作光罩

先將光阻貼附在基材上,經曝光顯影後的光阻形狀,即是stencil 開口形狀

將光阻圖案,塗佈於光阻開口下,即成電鑄

# Storage Energy

•Formosa Sun Energy Corp is an expert at facilitating all stages of green energy solution with its lineup of high performance solar modules, extensive expertise in power plant engineering and construction, and an integrated platform of long-term operation and maintenance service, as well as all-round power plant solutions. Furthermore, RITEK Group has also been committed to develop high-efficiency lithium battery modules from PCS, BESS, and EMS system to AIOT devices. Let customers to generate electricity while also storing additional energy and protecting the earth's resource.

# Health industry

# 鍊工場長照整合營運體系

- ◆ Aging in Place
- ◆ Through the construction of a community long-term care system, the elders can stay in the community longer
- ◆ Develop diversified "local" services to serve local people
- ◆ Connect resources to build a community care network to improve service cost efficiency
- ◆ Prioritize the provision of home support and daycare services to reduce dependence on nursing institutions
- ◆ How to build a financial system to support the development of a community-based long-term care system
